SauceDemo | Manual QA Testing Report

Independent portfolio case study | 17 October 2026 | Application: https://www.saucedemo.com/

Scope: authentication, cart operations, checkout validation, order completion, pricing, and product sorting. Testing performed manually using the standard_user demo account. This is not a commissioned audit or security assessment.

Executive summary

Functional test cases	Passed	Failed	Confirmed UI defects	Pending observations
8	8	0	1	1

All eight planned functional test scenarios passed. A separately documented visual defect was confirmed on the invalid-login error message. Passing functional tests do not establish that the application is defect-free.

Test execution log

ID	Scenario	Result	Actual outcome
TC-001	Valid login	PASS	Standard user successfully reached inventory.
TC-002	Invalid login	PASS	Invalid credentials rejected; error message displayed. Visual defect tracked separately as BUG-001.
TC-003	Add to cart	PASS	Backpack added; cart badge showed 1.
TC-004	Remove from cart	PASS	Backpack removed; cart badge disappeared.
TC-005	Required-field validation	PASS	Blank checkout blocked: Error: First Name is required.
TC-006	Successful checkout	PASS	Order confirmation shown; cart badge disappeared.
TC-007	Pricing calculations	PASS	29.99 + 9.99 = 39.98; 39.98 + 3.20 tax = 43.18.
TC-008	Price sorting ascending	PASS	Six products displayed in ascending price order.

BUG-001 | Login error message overflows its container

Status: Confirmed in tested environment | **Severity:** Low / Minor | **Type:** UI / Layout

Environment: Windows 10 Home; Google Chrome 155.0.8059.39; zoom 100%; viewport 1440 × 783 CSS pixels.

Reproducibility: 3 of 3 initial attempts, plus a subsequent positive retest at 1440 × 783.

Steps to reproduce

1. Open https://www.saucedemo.com/ at 1440 × 783 and 100% zoom.
2. Enter username **invalid_user** and password **wrong_password123**.
3. Click **Login**.
4. Inspect the red authentication error message.

Expected vs actual

Expected: The full error message fits within its notification area and remains readable without overlapping neighboring form elements.

Actual: The error message wraps beyond the available red notification area and overlaps or is clipped by surrounding elements.

Impact: Authentication feedback is harder to read. Invalid-login rejection still works, so TC-002 remains a functional PASS.

Viewport comparison: The issue was not visible in a screenshot at 661 × 783 while DevTools was docked. This suggests viewport-dependent layout behavior, but does not establish the CSS root cause or exact affected breakpoint.

OBS-001 | Unusual product copy

Sauce Labs Backpack description starts with **carry.allTheThings()** on product and cart pages. This may be deliberate developer-oriented copy. Classification: content/usability observation pending product-owner clarification; not a confirmed bug.

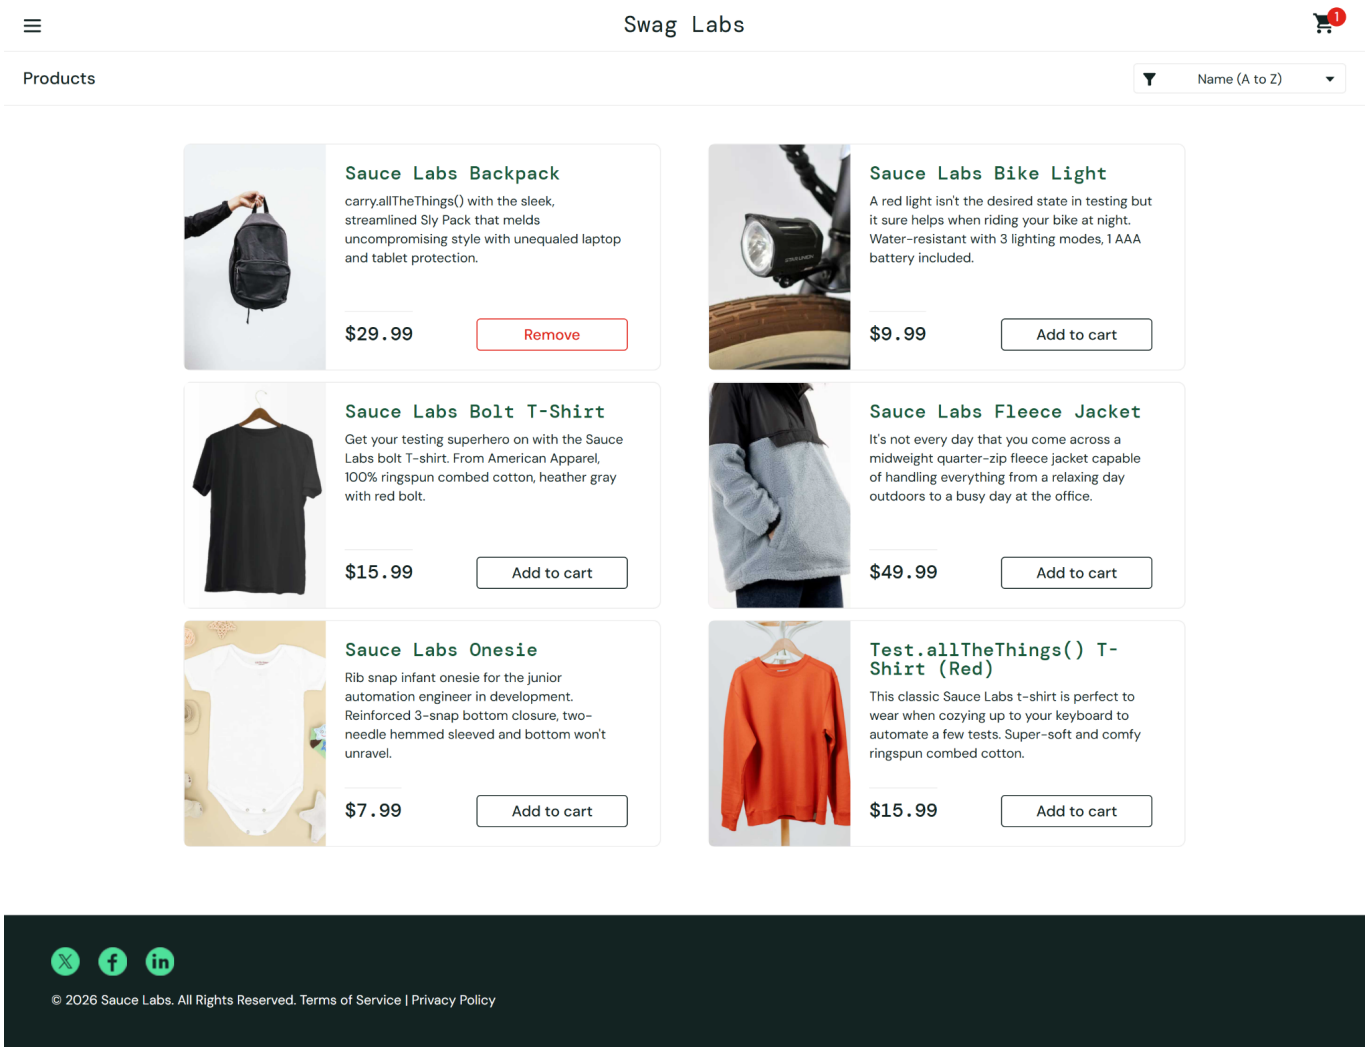

Limitations and conclusions

Testing covered eight selected scenarios using a demonstration application. Browser/device coverage was limited, and no security, accessibility, performance, or automated regression audit was performed. BUG-001 is supported by a user-reported repeatable observation and screenshots; no source-code investigation was conducted.

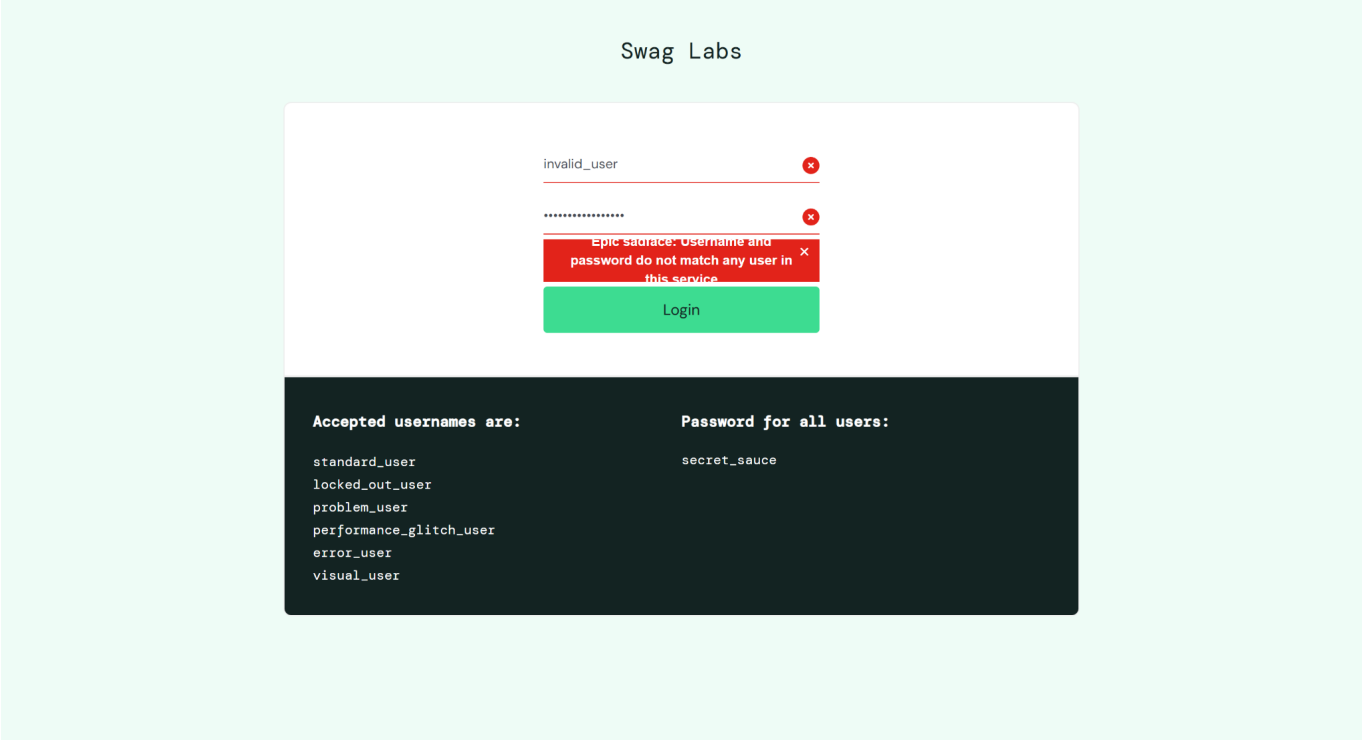

Screenshot evidence appendix

Screenshots supplied by the tester. They document the displayed application state; they do not independently establish every underlying interaction.

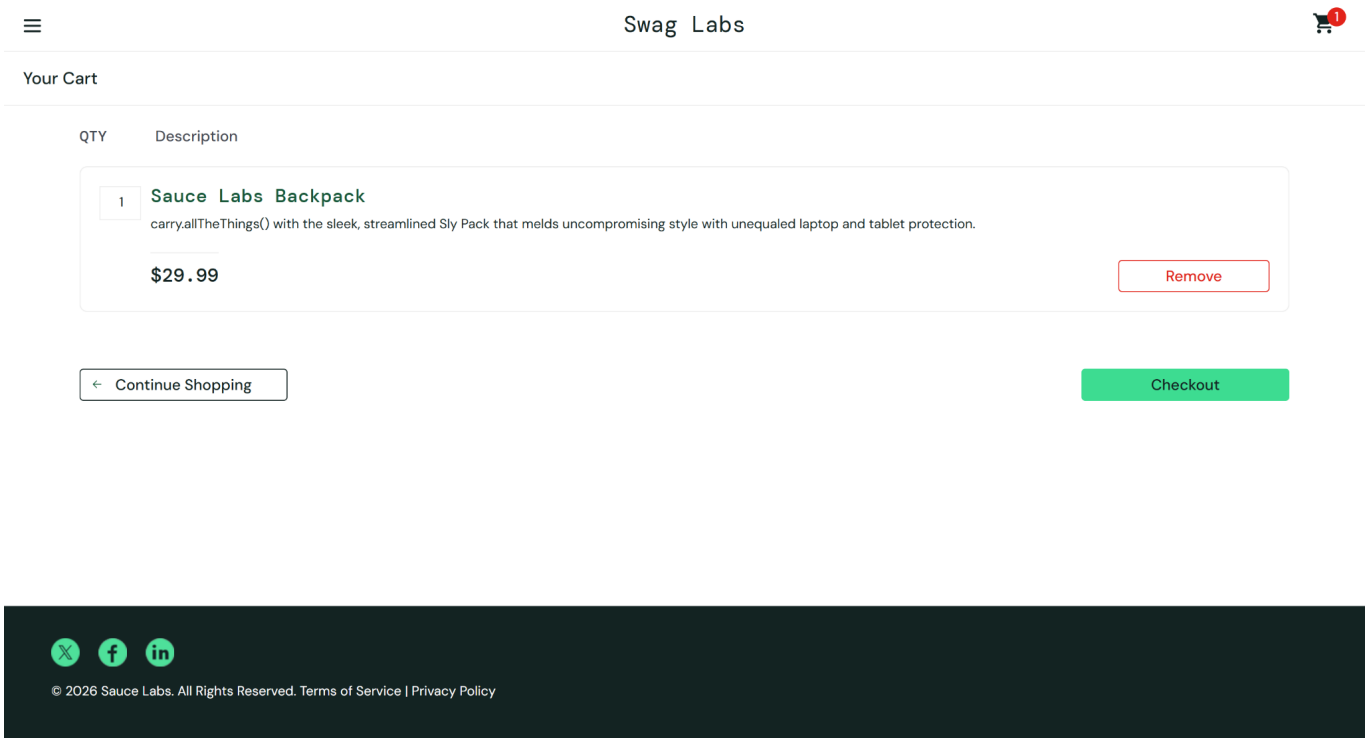

TC-001 — Inventory after successful login

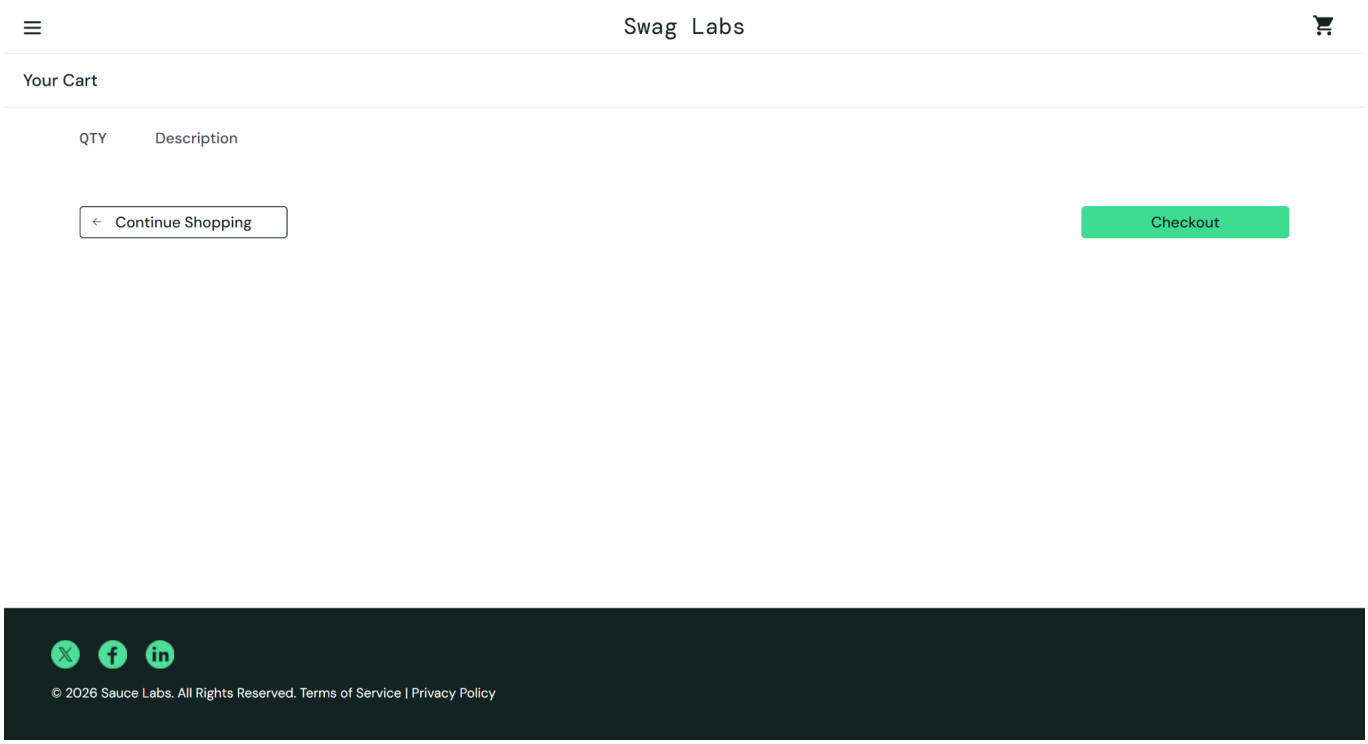

TC-002 — Invalid-login error and BUG-001 evidence

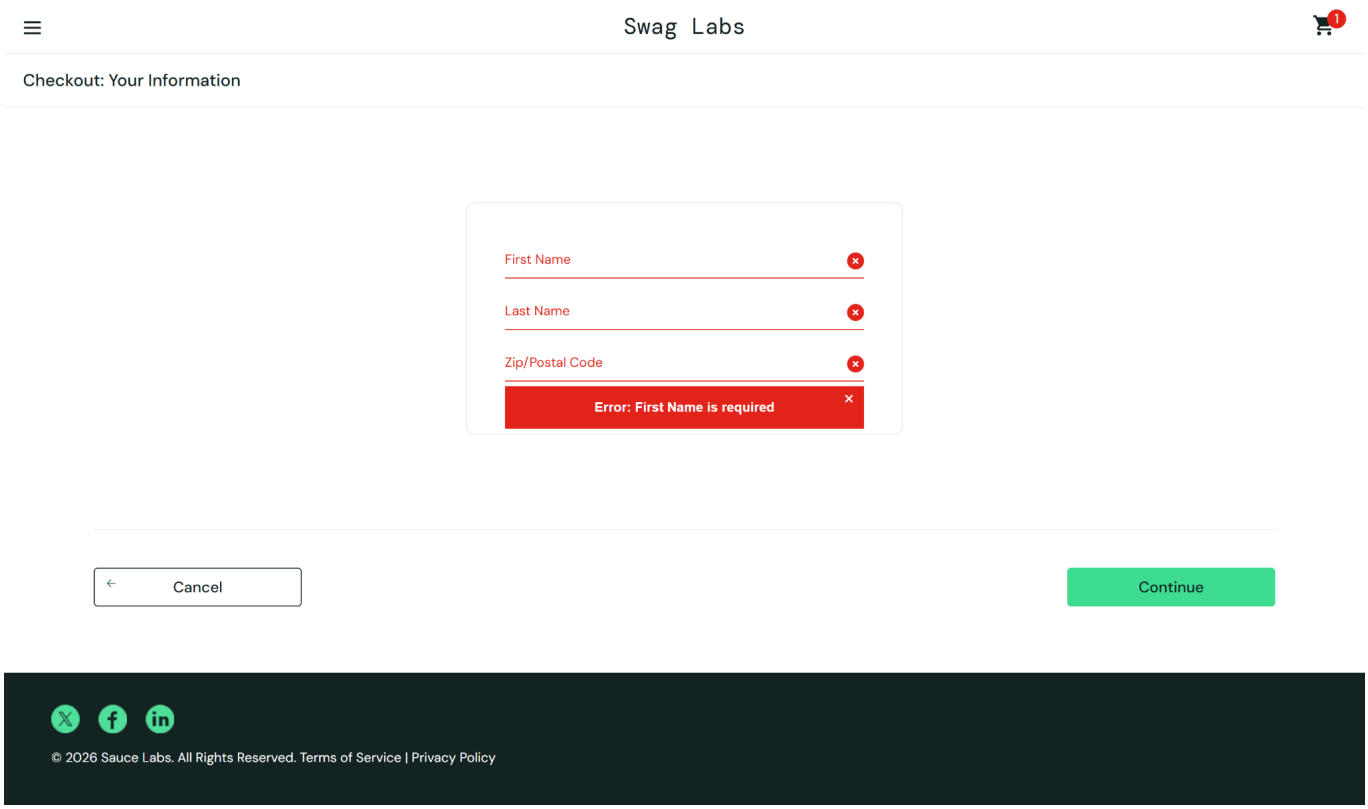

TC-003 — Backpack in cart

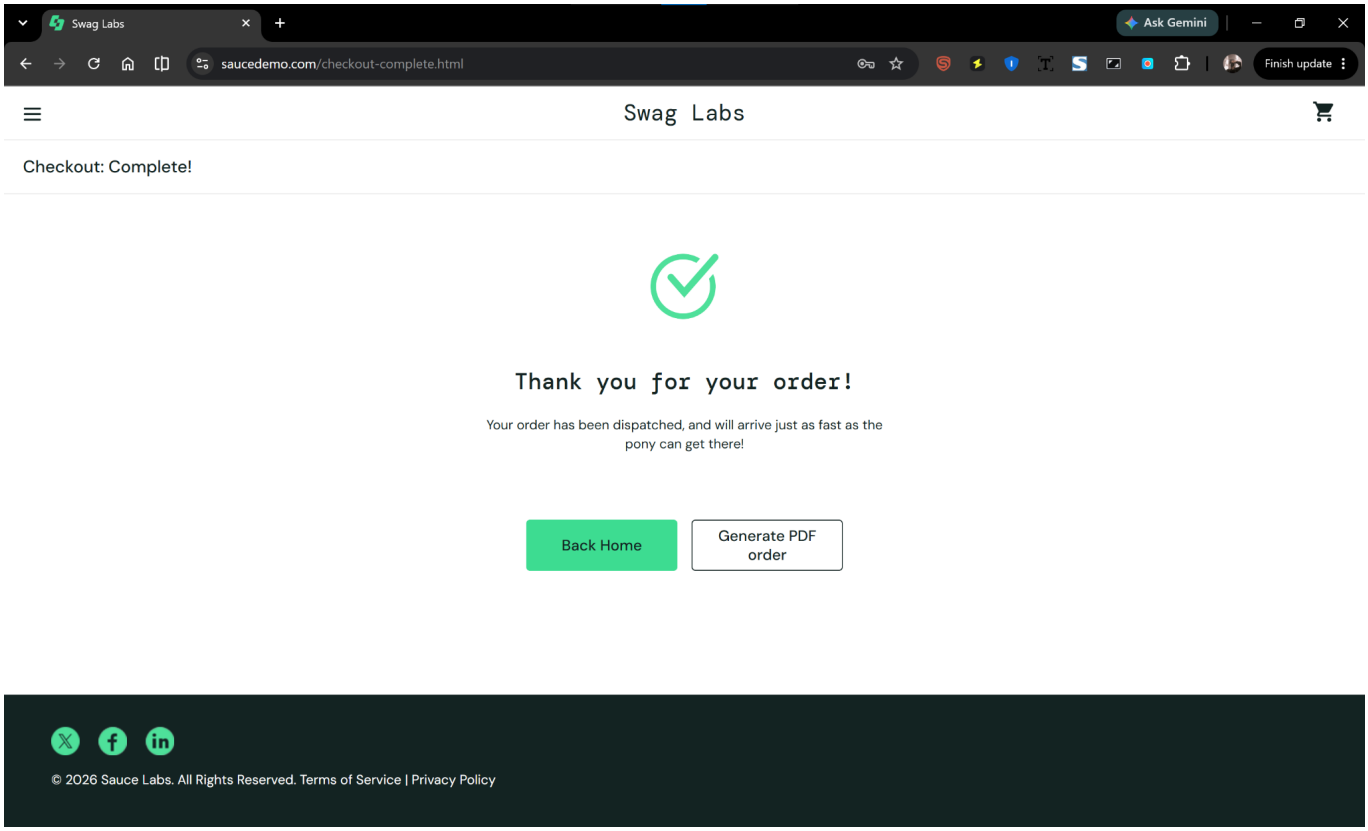

TC-004 — Empty cart after removal

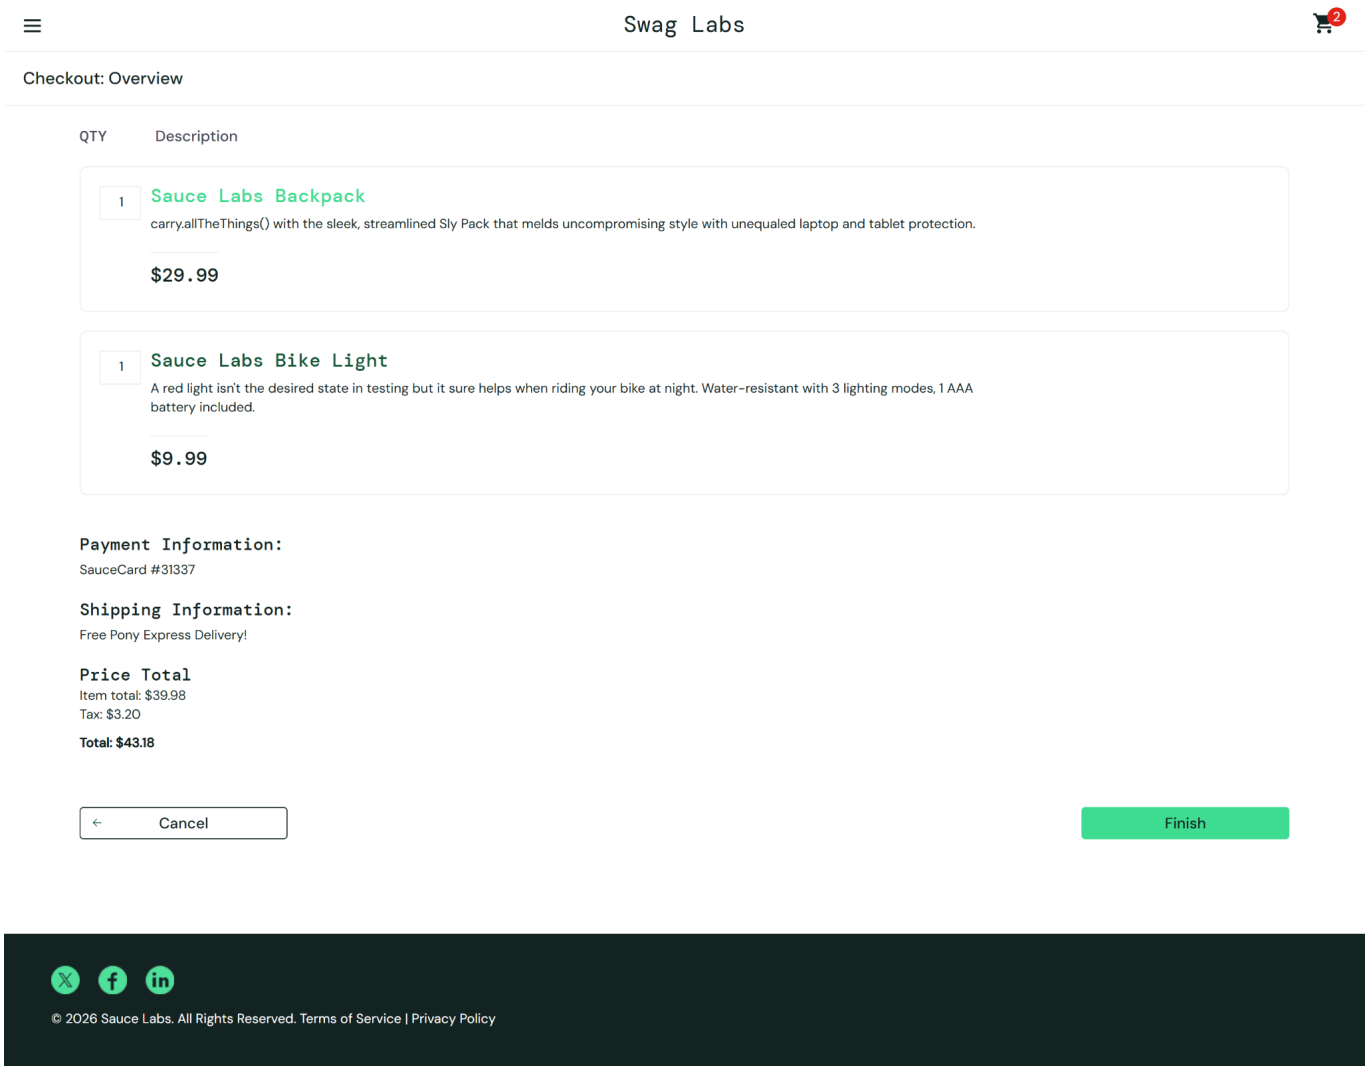

TC-005 — Checkout required-field error

TC-006 — Completed order confirmation

TC-007 — Checkout overview and pricing

TC-008 — Ascending price sorting

Swag Labs

Products

Price (low to high)

Sauce Labs Onesie

Rib snap infant onesie for the junior automation engineer in development. Reinforced 3-snap bottom closure, two-needle hemmed sleeved and bottom won't unravel.

$7.99 Add to cart

Sauce Labs Bike Light

A red light isn't the desired state in testing but it sure helps when riding your bike at night. Water-resistant with 3 lighting modes, 1 AAA battery included.

$9.99 Add to cart

Sauce Labs Bolt T-Shirt

Get your testing superhero on with the Sauce Labs bolt T-shirt. From American Apparel, 100% ringspun combed cotton, heather gray with red bolt.

$15.99 Add to cart

Test.allTheThings() T-Shirt (Red)

This classic Sauce Labs t-shirt is perfect to wear when cozying up to your keyboard to automate a few tests. Super-soft and comfy ringspun combed cotton.

$15.99 Add to cart

Sauce Labs Backpack

carry.allTheThings() with the sleek, streamlined Sly Pack that melds uncompromising style with unequaled laptop and tablet protection.

$29.99 Add to cart

Sauce Labs Fleece Jacket

It's not every day that you come across a midweight quarter-zip fleece jacket capable of handling everything from a relaxing day outdoors to a busy day at the office.

$49.99 Add to cart
